Ákos Szokodi

Software consultant at Reaktor, based in Amsterdam 🌷

szokodiakos+cv@gmail.com github.com/szokodiakos linkedin.com/in/szokodiakos

Profile

I am a pragmatic full-stack developer with a soft spot for software quality: clean code, solid design patterns, thorough testing, and thoughtful UX. I am fluent in TypeScript, Node.js, and React, and a polyglot at heart, so I let the problem pick the tool.

I put the team first, building trust, joy, and great collaboration with a warm, lighthearted atmosphere and a steady supply of jokes.

Experience

Reaktor

Software consultant, Amsterdam Jul 2018 – present

Build web, mobile, and backend software for global consumer brands, working inside the clients' own teams. Put a strong focus on code quality and team health, from testable architecture and frontend performance to facilitating standups and retrospectives.

Since 2025, bring AI-assisted development with Claude into client teams: custom skills and subagents, agentic workflows, and day-to-day practices spread across the team.

Selected projects

Merchant ad activation Backend, Kotlin

Built the API behind a messaging-based flow that showed merchants their potential revenue uplift and let them launch a ready-to-go ad campaign with a single tap. Used agentic solutions throughout, from navigating dozens of repositories to setting up deployments and monitoring dashboards.

Ecommerce experimentation Frontend, React

Built customer-facing features for a large ecommerce site as A/B tests, reported on how each variant performed, and shipped the winners to production.

Cross-platform mobile apps

React Native, GraphQL

Built apps for iOS and Android, including a social app with video and text posts, comments, likes, and livestreaming, and a data analytics app.

Developer platform

Backend, Node.js and TypeScript

Worked in the platform team behind a large developer portal. Refactored older parts of the codebase into a testable service layer architecture, with custom Claude skills and subagents applying the same blueprint automatically, and set the direction for how the team uses agentic workflows day to day.

Interactive planning boards Frontend, React

Built a presentation app where products are arranged on interactive boards, a PowerPoint and Excel hybrid with drag and drop, resizing, text formatting, a grid system, validation, and keyboard shortcuts. Put a strong focus on frontend performance.

Product data and payments Backend, Kafka

Laid the foundations for Kafka-based streaming of product and inventory data, replacing day-long batch runs. Later wired third-party payment providers into a checkout API.

Languages	Frontend and mobile	Backend and data	Cloud
TypeScript, JavaScript, Kotlin	React, Next.js, React Native	Node.js, Spring, Kafka, PostgreSQL, GraphQL	AWS, Kubernetes

Coding Sans

Software engineer, Budapest May 2015 – Jun 2018

A Budapest-based software agency that builds web and mobile apps for clients. Developed full-stack applications for small to large companies, including a social network, a cloud-based healthcare management system, sports betting, a sales web and mobile app, an SMS marketing solution, and an email creator/editor. Authored a range of tech posts on the company blog.

JavaScript, TypeScript, React, Angular, Node.js, PostgreSQL, AWS

Quanopt Ltd.

Junior software engineer, Budapest Jun 2013 – Aug 2014

A Budapest-based data analytics startup. Built a browser-based solution for saving, loading, and capturing data visualizations made with R and Processing.

R, Shiny, JavaScript, Processing

Beyond client work

Amsterdam office events Ongoing

Keep the Amsterdam office community lively by hosting and organizing events, from quiz nights and the company Olympic Games to all-day AI game dev hackathons.

Talent Growth Team interviews Until 2024

Led and took part in cultural and technical interviews for Reaktor's Talent Growth Team.

Cultural ambassador, Reaktor Lisbon
2022–2023

Alongside client work, helped the brand-new Lisbon office grow by taking care of newly hired colleagues and bringing along the established culture and Reaktorian spirit from Amsterdam.

Team Build Academy 2022

Completed Reaktor's Team Build Academy, an internal course on team building, leadership, team dynamics, and communication.

Education

Computer Engineering MSc (2014–2016) and Computer Engineering BSc (2010–2014), Budapest University of Technology and Economics. Theses on data visualization and reusable user interfaces.

Languages

Hungarian (native), English (fluent, professional working proficiency)
